

Facility Marking Assessment & Audit Service

IDENTIFICATION SERVICES

A cost-effective solution for anyone who wants to upgrade their identification program, but doesn't know how or where to start.

- ▶ Increase safety compliance.
- ▶ Bring over 20 years of plant marking expertise to your facility.
- ▶ Save the weeks of data collection effort needed to develop a proper plant audit internally.
- ▶ Ensure the right marking and labeling products for the right applications.

A Brady Project Manager will come to your facility and examine:

- ▶ General Safety Signage
- ▶ Personal Protective Equipment (PPE) Notices
- ▶ Confined Space Warnings
- ▶ Safety Shower and Eyewash Identification
- ▶ Portable Fire Protection Equipment Identification
- ▶ Pipe Marking
- ▶ Tank and Vessel Signage and Placarding
- ▶ Electrical Panel Safety Marking

Upon Completion, the Facility Marking Assessment & Audit Provides:

- ▶ Comprehensive 45+ page report that provides a complete evaluation and documentation of your existing plant marking
- ▶ Strengths and weaknesses of your existing labeling and marking program, with photographic references
- ▶ Prioritized corrective action steps to improve your facility marking and become more visually instructive
- ▶ Complete list of exact signs and markers needed to upgrade plant marking and help comply with regulatory requirements, industry standards and good engineering practices.

Brady's on-site facility marking assessment & audit provides a professional evaluation of your facility. A project manager will inspect your facility and interview key personnel to assess its current state. A plant walk-down identifies the appropriate safety signs, pipe markers and tank/vessel signs needed to effectively communicate safety and operational messages.
